

TEJENDRA DHARIKAR

Fullstack Developer · TypeScript / Next.js / Express / Prisma

Nepal (Open to Remote) | tejendradharikar@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Fullstack developer with production experience across TypeScript, Next.js, Express.js, Prisma ORM, MySQL, and PostgreSQL. Delivered a full client web application end-to-end as a freelancer and currently build APIs and frontend features on a live product as part of a development team. Seeking remote fullstack/backend opportunities.

EXPERIENCE

Fullstack Developer Intern — SkillPrompt

Jun 2026 – Present

Project: *yourOSHC*

- Built and maintained REST APIs for a production web application using Express.js and Prisma ORM.
- Developed new frontend pages and features end-to-end using Next.js and TypeScript.
- Identified and fixed bugs across the frontend and backend of a live product.
- Collaborated with a cross-functional development team on a shared codebase and workflow.

Freelance Fullstack Developer — Self-employed — Jun 2026

Client project: *Manjushree Clinic — manjushreeayurvediccenter.com*

- Independently designed, built, and deployed a full production website for a healthcare clinic client, including a public-facing site (services, doctors, appointments, blog, gallery) and a private admin panel.
- Built the admin panel with complete CRUD functionality to manage doctor profiles and patient appointments.
- Used TypeScript, Next.js, Express.js, Prisma ORM, and PostgreSQL across the full stack; handled deployment and client delivery independently, and was paid for the completed project.

Fullstack Developer Intern (Training) — SkillPrompt

Jan 2026 – May 2026

- Completed a structured internship working hands-on with a production-level web application.
- Built foundational experience with the team's tech stack and development workflow ahead of transitioning into a paid role.

PROJECTS

campusMate — Student Management System

- Web application for managing student records and related administrative workflows.

chautari — Mini Social Media Platform

- Social networking application with feed and user interaction features, built with TypeScript.

e-commerce — CRUD Storefront Application

- E-commerce CRUD application using TanStack Query, TypeScript, Tailwind CSS, and React Router.

SKILLS

Languages: TypeScript, JavaScript
